

Entreda Phishing Platform

Take steps to avoid phishing scams

The Entreda phishing platform provides real-world email simulations with engaging security awareness modules that combine lecture and interactive exercises – a proven technique to increase retention and interest in the material

Realistic Tests

Crowdsourced and customer contributed phishing messages are designed and tested to simulate real-world conditions including their ability not to land in “spam”

Automatic education

Phished learners are automatically presented with anti-phishing education, both on the web page where they were phished and in follow-up emails

Unify Cybersecurity Compliance Software

Entreda Unify is a cybersecurity compliance software that Monitors, Automatically Remediate non-compliances and generates SEC/FINRA Compliance Reports for Financial firms

With evolving cyber threats, Unify helps you manage all users, devices and networks ensuring a cybersafe environment

Listed in FINRA's vendor directory
