

3rd Party Vendor Risk Assessment

Third party vendor risk management is a critical component of your overall cybersecurity governance framework.

Third party vendors may have access to personally identifiable information (PII) of clients

Therefore if vendors have weak cybersecurity protocols the parent organization could be at risk

To this end Entreda inventories all third party vendors and continually performs due diligence and generates reports per regulatory guidelines

Why Entreda?

With decades of cybersecurity and automation experience, we offer cybersecurity solutions driven by patented technology and competitive rates for any budget.

Listed in FINRA's vendor directory

Steps involved

1: Inventory

Inventorize third party vendors and determine which have access to PII

2: Library Check

Check existing library for completed standard information gathering (SIG) forms

3: Retrieval

Acquire SIG forms from all vendors per regulatory guidelines annually

4: Verification

Verify all information provided in the SIG form is accurate and view at any time on the platform
