

# Entreda services for VAPT

Vulnerability Assessment  
and Penetration Testing

2018

**Entreda's Vulnerability Assessment identifies and quantifies vulnerabilities, and provide recommendations to mitigate or eliminate risks.**

Entreda's security engineers perform the Penetration Test with a four step approach to simulate the tactics employed by malicious hackers. During this process vulnerabilities are identified and documented.

## 4 Step Approach

### 1: Discovery

We scan and interrogate your systems to discover, verify and identify security flaws

### 2: Gain Access

We use tools & techniques to identify weaknesses and vulnerabilities that could be exploited

### 3: Take Control

With your approval we demonstrate ways to capture your critical data

### 4: Collect Evidence

We document our findings in an executive summary and a detailed technical report
